- **syllabus**

SunoikisisDC 2015
Course Topic

Pentekontaetia and Peloponnesian War

SunoikisisDC 2016
Course Topics

Technical approaches concerning Digital Classics

Students will be introduced to a range of technical approaches concerning Digital Classics (TEI XML, EpiDoc, treebanking, linguistic annotation, translation alignment, text reuse representation, etc.). Students are invited to consider how each technical approach offers new ways of "reading" texts or material evidence from the ancient world, and provides cross-disciplinary approaches to the relationship between historical and literary culture. The course will be offered through common sessions online via Google Hangouts, studying particular topics at the boundaries of history and culture for 60 minutes each week. Students will work on a practical project implementing some of the skills learned in the course, by agreement with the course tutor, which will be assessed along with a short report on the work.

SunoikisisDC 2016
Learning Tasks

- **Annotating morphology and syntax (treebanking)**

- **Aligning translations**

- **Creating new aligned translations**

- **Annotating quotations and text reuses**

- **Producing short commentaries**

- **Identifying people and places**

- **Annotating social and geospatial relationships**

- **Annotating events**

- **Updating older reference works** (e.g., W. Smith, *A Dictionary of Greek and Roman Antiquities*, …)

- **Drawing on evidence from the sculpture, coins, vases for the social context**

- **Working with epigraphic data**

- **Trying to develop geospatial data**

- **…**

SunoikisisDC 2016
Perseids Funcionalities

- Treebanking

- Translation alignment

- Annotating quotations and text reuses

- Annotating inscriptions (EpiDoc)

- Working with images of inscriptions

- Commentary on specific passages

- Annotating named entities

SunoikisisDC 2016
ePortfolio

- ## how do we evaluate data?

- ## how do we show/disseminate data and results?

SunoikisisDC 2016
